

# Do It Yourself Soda Geyser

## Supplies:

**Goggles**—to protect your peepers.

**Soda**—a 2-liter bottle of Diet Coke or Diet Pepsi. Room temperature is best.

**Mentos**—only mint will do.

**The Card**—part “A” will fit the bill.

**The Tube**—part “B”, a piece is all you need.

## Directions:

Find a spot outside where you can get messy.

Place your soda on the ground and open the bottle.

Get your goggles on. Running shoes might be a good idea too.

Make a tube from the cut rectangle (B). You can roll it around the pack of Mentos to shape it.

Hold the tube upright and place the card (A) across the bottom the tube.

Fill the tube with 4–6 mint Mentos. Keep the card in place so the candy doesn’t fall out!

Carefully hold the tube and card directly over the open mouth of the bottle.

Remove the card and let the Mentos drop into the bottle.

Head for the hills!

**Watch your geyser erupt!**
